Examinations

Our examinations are a good representation of the course material and are given fairly
Not too hard.

Very clear expectations.

Exams are fairly made and graded. Great reviews!

The midterm was not too hard and she gave a great review sheet for us to help us study. She is very fair, overall.

The number of exams were fair, clear and to the point.

Examinations were appropriate and the study material provided were excellent.

I believe the exams are too difficult as the choices are too wordy and confusing, it seem like the objective is to trick the students rather than learn.

Course content

This course brings light to LEP students and the way they learn

The content was good. It was very relevant.

Very interesting class

The course content was pretty boring, but we had to take this class to graduate. This course is probably going to be very irrelevant to me in my future.

Overall, I thought the course content was important for us to learn. However, sometimes the material was a bit hard to understand.

I would rather have had a more in depth study of different teaching methods and how those correlate into teaching rather than spend so much time on research paper presentations. Although those are interesting I do not feel they have offered me much in the way of how to associate what I learned from them into my teaching practice.

I feel that the instructor should work in more grades so that the final grade does not only rely on testing.

Instructor

I like Steffi, she is fun, and brings the information down to a level where it is easily understood.

The instructor did a good job. Taught clearly.

She is a very good instructor.

She is very into this subject and really knows what she is talking about. She does a great job with everything she teaches. She also sends us the slides to our emails as soon as the lecture is over. Shes a great teacher.

The instructor is very knowledgeable, profesional, respectful, considerate, and has a great sense of humor, and makes learning fun. She never hesitated to explain the material twice and made sure we understood it.

Instructor is understanding and willing to work with students to improve lessons.

A very nice and knowledgable person. Aensitive and understanding of students needs.

Course structure

good structure

The structure worked well.

The structure was fine and she went by the syllabus.

The teacher makes a wonderful job of keeping everything organized and in a timely manner.

Class performance evaluated by few assignments.

Student's self-assessment

I have done well in this course. I prob. need more background knowledge on some of the topics.

I wish I had managed my time better in this course. Nonetheless, I will still probably get an A.

I did well on class projects such as research and presentation, contributed to and during group work. I believe that I can improve my learning by contributing/sharing prior knowledge and personal experiences.

I feel that the work I provided for this course was of excellent quality.
