MAC1114 Homework Scoring Rubric

Each assignment is worth 15 points accumulated from the following:

- **Format (2 points, all or nothing)**
  - Complete homework on white lined or printer paper.
  - Use a pencil (preferred) or pen with blue or black ink.
  - On the top right corner of the paper write: your name, MAC1114, your section number, and the lecture number the homework assignment is for.
  - Before the problem set, write the book section number and the problem numbers for each section the assignment covers.
  - Clearly label each problem number and box, circle, or highlight your final answer when applicable.
  - **STAPLE** the homework together by lecture. Different lectures might be covered on the same day, keep them separate and a lecture might contain more than one section, keep them together.

- **Turned in on time (2 points, all or nothing):**
  - Homework is considered turned in on time if it is turned in during class within the first 10 minutes on the day it is due.
  - Homework can be turned in late by 5pm to Little Hall 487 the day it is due for a two point penalty. You must bring all completed homework because a different homework than was collected during class will be graded. After this time, homework will **not** be accepted.

- **Completeness (3 points, partial credit)**
  - If one or two problems are not complete, then you will lose one or two points, respectively. If three or more are incomplete, then you will lose 3 points.
  - Answers with no work on problems that require work will receive no credit.

- **Correctness (8 points, partial credit)**
  - Four problems will be graded for correctness at two points each. One point will be given for a reasonable attempt if the answer is not correct.
  - Answers with no work on problems that require work will receive no credit.
