

CURRICULUM VITAE

NAME: DOUGLAS CENZER

PRESENT POSITION: Professor

ADDRESS

Department of Mathematics

P.O. BOX 118105

University of Florida

358 Little Hall

Gainesville, FL 32611-8105

email: cenz@ufl.edu

URL: www.math.ufl.edu/~cenz

phone: 352-392-0281 x262

EDUCATION

University of Michigan, Ph.D., Mathematics, 1972 (NSF Graduate Fellow)

Michigan State University, B.S., Mathematics, 1968 (Ford Motor Co. Fund Scholar)

PROFESSIONAL EXPERIENCE

Chair, Department of Mathematics, University of Florida, 2013–2018

Professor of Mathematics, University of Florida, 1987–

Visiting Fellow, Newton Institute, Cambridge, Spring 2012

Visiting Fellow, Mathematical Science Institute, Singapore, Summer 2011

Visiting Scholar, University of California at San Diego, 2002

Member, Math. Sciences Research Institute, Berkeley, 1989-1990

Visiting Professor, University of Michigan, Summer 1989,1998,2000,2005

Associate Professor Mathematics, University of Florida, 1977-1987

Visiting Associate Professor, North Texas State University, 1981-1982

Assistant Professor Mathematics, University of Florida, 1972-1977

NSF Graduate Fellow, University of Michigan, 1968-1972

Research Assistant, National Security Administration, 1967

AWARDS

Anderson Scholar, CLAS, 1995, 1999, 2000, 2005, 2007

Exemplary Mentor Award from SEAGEP (Southeastern Alliance for Graduate Education and the Professoriate), 2006.

STEP (Sustained Performance Award), University of Florida, 2001 and 2009

CLAS Bonus Award, University of Florida 1997

TIP Teaching Award, University of Florida, 1998

GRANTS

NSF Conference grant, Southeastern Logic Symposium (SEALS), Co-PI \$45,000, 2014–2018

NSF Computability in Europe 2011 (Conference Grant), PI \$20,000

NSF Focused Research Group, PI, \$580,000 (\$65,000 UF), 2007-2011, (NSF DMS 0652732)

NSF Collaboration in Computability (Binational Travel Grant with Russia and Kazakhstan, co-PI (Julia Knight, Notre Dame PI), 2000-2004 (\$30,000);

renewed for 2006-2009 (\$75,000);

renewed for 2011-2014 (\$75,000)

Effectively Closed Sets, UF Faculty Enhancement Opportunity, PI, \$22,824, 2010-2011.

DSR Award, University of Florida 1978 (\$5000) and 1991 (\$8000)

NSF Special Year in Logic Award, co-PI, 2005-2008 \$138,000 (NSF DMS 0532644)

Grants for travel to numerous conferences, for example:

Colloquium Logicum, Bayreuth, Germany, September 2019, \$2000

Workshop on Constructive Mathematics, LMU (Munich), April 2018 \$2700

Aspects of Computation, National University of Singapore, September 2017, 2 weeks food and lodging

Workshop on Incomputability, Newton Institute, Cambridge, England, June 2012: \$2000 plus 1 week food and lodging

Recursion Theory Workshop, Computational Prospects for Infinity, National University of Singapore, 2011 \$2400 plus 2 weeks food and lodging;

Logic Seminar, Notre Dame University, April 2009: \$500 plus 3 days food and lodging;

Computability, Reverse Mathematics and Combinatorics, Banff Research Station, 2008: 1 week food and lodging;

Workshop on Effective Randomness, Chicago, 2007: \$800 plus 1 week food and lodging;

American Institute of Mathematics workshop on algorithmic randomness, 2006: \$1000 plus 1 week food and lodging

LISTINGS

American Men and Women of Science

Who's Who in America;

Who's Who in Frontier Science; Who's Who in American Teachers

ORGANIZATIONS

Association for Symbolic Logic, Chair, Membership Committee, 2001–2007

Phi Beta Kappa, Chapter President, 1994

CCA (Network for Computability and Complexity in Analysis)

CiE (Association for Computability in Europe)

American Mathematical Society; Pi Mu Epsilon;

EDITORIAL ACTIVITIES

Archive for Mathematical Logic (Springer-Verlag) Editorial Board, 2002–
Chinese Journal of Mathematics, Editorial Board, 2013–
The Scientific World Journal, 2013–
Edited special issue of Annals of Pure and Applied Logic, vol. 93 (1998).

Referee for numerous journals, including Amer. Math. Monthly, Ann. Pure and Appl. Logic, Trans. Amer. Math. Soc., Proc. Amer. Math. Soc., J. Math. Logic, Bull. Symbolic Logic, Contemporary Math., Theor. Comp. Science, J. Logic and Computation, Math. Logic Quarterly, Algorithmica, J. Math. Anal. and Applications, J. Symbolic Logic, Archive Math. Logic, Electronic Notes in Comp. Sci., Tohoku Math. J., Information and Computation, Real Analysis Exchange, J. Comp. Sci. and Technology.

CONFERENCES ORGANIZED

1. Organizing Special Session on Computability at ASL annual meeting, New York, May 2019
2. Co-organized 4 recent Southeastern Logic Symposia (SEALS 2018, SEALS 2017, SEALS 2016, SEALS 2015) in Gainesville.
3. Program Committee for CiE 2016, Paris.
4. Organizing Committee for joint AMS-ASL special session on Probability and Logic, Joint Math Meetings, Baltimore, January 2014.
5. Program Committee for CIE 2012 (Cambridge).
6. Organized Special Session at AMS Regional Meeting in Washington, D.C., March 2012
7. Organizing Committee and also Chair of Special Session on Classical Computability Theory at CIE 2011 (Sofia).
8. Organizing Committee, 5th Conference on Logic, Computability and Randomness, Notre Dame, May 24-28, 2010, with support from National Science Foundation.
9. Program Committee, Seventh International Conference on Computability and Complexity in Analysis, Zhenjiang, China, June 21-25, 2010.
10. Co-organized SEALS 2010, February 2010.
11. Organized Summer School in Algorithmic Randomness, Gainesville, June 2008.
12. Program Committee, Computability and Complexity in Analysis (CCA 2007), Siena, Italy, June 2007
13. Local Organizing Committee, Association for Symbolic Logic, Annual Meeting, March 2007.

14. Co-organized Workshop on Model Theory and Computable Model Theory, Gainesville, February 2006
15. Organized Computability and Complexity in Analysis (CCA 2006), Gainesville, November 2006
16. Co-organized SEALS 2006, 2005, 2004, Gainesville, April 2006
17. Program Committee for Computability and Complexity in Analysis (CCA 2004), Cincinnati, August 2003
18. Organized AMS Special Session Computability and Models, Annual Meeting, Baltimore, January 2003
19. Organized AMS Special Session on Computability Theory, Annual Meeting, San Diego, January 2002
20. Organized AMS Special Session on Computability Theory, Gainesville, Florida, March 1999
21. Organized AMS Special Session on Recursive and Feasible Mathematics, Orlando, Florida, January 1996
22. Local Organizing Committee, ASL Annual Meeting, Gainesville, Spring 1994

OTHER PROFESSIONAL ACTIVITIES

Reviewer for funding agencies:

National Science Foundation;

National Research Council of Canada;

Marsden Fund (New Zealand)

Research Foundation - Flanders (Fonds Wetenschappelijk Onderzoek - Vlaanderen, FWO);

France-Berkeley Foundation

Reviewed dissertation for Ackermann Award of European Association of Computer Science Logic;

External Member of Ph.D. Committees at Auckland U. (New Zealand), Nanyang U. (Singapore), Notre Dame U.

Reviewer for Habilitation, U. Vienna (Austria)

External reference for hiring, tenure and promotion at U. Michigan, Penn State, U. San Francisco, U. Connecticut George Washington U., National U. Australia, U. West Florida, U. Cincinnati, Arcadia University, Kenyon College, Auckland U. (New Zealand).

THESES AND DISSERTATIONS

Francis Adams, 2017 (Co-directed with J. Zapletal), Ph.D. Dissertation "Anticliques in Borel Graphs on Polish Spaces and Computable Ultrahomogeneous Structures"

Ferit Toska, 2013 Ph.D. Dissertation "Effective Symbolic Dynamics and Complexity"

Sebastian Wyman, 2013 Ph.D. Dissertation, "Closed Sets, Continuous Functions and Symbolic Dynamics in the Arithmetic Hierarchy"

Paul Brodhead, 2008 Ph.D. Dissertation "Computable Aspects of Closed Sets"

S. Ali Dashti, 2008 Ph.D. Dissertation "Effective Symbolic Dynamics"

Zia Uddin, 2004 Ph.D. Dissertation "Structures Subject to Space Complexity"

Farzan Riazati, 2001 Ph.D. Dissertation "On the Lattice of Π_1^0 Classes"

Amy Vanderbilt, 2000 Ph.D. Dissertation "Common Derivations in Locally Determined Non-monotonic Rule Systems and their Complexity"

William Moser, 1996 Ph.D. Dissertation "Approximation Methods in Inductive Inference (Undergraduate) Diego Rojas, McNair Scholar and NSF Grad Fellow, "Computability and Differentiability of Functions on the Cantor Space", 2017

(Undergraduate) Marc Betinsky, 1995 Senior Honors Thesis "Implications and Explorations of the Wronskian" - Undergraduate Research Symposium winner 1995

Reviewer for Habilitations at U. Heidelberg (Germany), U. Vienna (Austria), U. Bundeswehr (Germany)

External reviewer for Ph.D. candidates at U. Notre Dame, U. Waterloo (Canada), U. Auckland (New Zealand)

UNIVERSITY SERVICE

Council on Academic Freedom, Faculty Quality and Faculty Welfare, 2004-2007 and 2014-Faculty Senate Nominating Committee, 2005-2007

Committee on Academic Freedom, Tenure, Professional Relations and Standards, 2004-2007 Goldwater Scholarship Committee, 2006-09

University Library Committee, 1976-80

Member, Faculty Senate 2004-2007, 1988-1990

CLAS Tenure and Promotion Committee, 1980-81, 2007-2009

CLAS Library Committee, 1979-81

CLAS Committee on Teaching and Advising Awards, 1998-1999 DSR Review Committee, 1992-1993

Phi Beta Kappa Vice President, 1991-1992; President 1992-1993

CLAS Search Committee for Department of Mathematics Chair, 1988

DEPARTMENT SERVICE

Department Chair (July 2013 to August 2018) Tenure and Promotion Committee (Chair 1993-2013, 2019)

Library Committee (Chair since 1975) Hiring Plan Committee
Steering Committee: 1983-85, 1986-88, 1998-2000, 2009-2011

SELECTED LECTURES (since 2000)

1. "Generically Computable Abelian Groups", Special Session on Computability, Canadian Math. Society Winter Meeting, Toronto, CA, December 2109
2. "Generically Computable Structures", Special Session on Computability, AMS sectional meeting, Hartford, CT, April 2019.
3. "Extraction Rates for Turing Functionals", Special Session on Computability, AMS sectional meeting, Honolulu, Hawaii, March 2019.
4. "Computability and Complexity in Structure Theory", Special Session on Computability in honor of Jeffrey B. Remmel, Joint Math Meetings, Baltimore, January 2019.
5. "Weakly Homogeneous Structures", ASL Hour Talk at Joint Math Meetings, Baltimore, January 2019.
6. "Complexity of Automatic Structures and Isomorphisms", Colloquium talk, College of Charleston, October 2018.
7. "Automatic Structures and Isomorphisms", Keynote Address, Colloquium Logicum, Bayreuth, Germany, September 2018.
8. "Generically Computable Structures", Workshop on Computability Theory and Its Applications", Waterloo, Canada, June 2018, sponsored by Fields Institute.
9. "Random and Online Continuous Functions", Keynote Speaker at LMU (Munich) workshop on constructive mathematics, April 2018.
10. "Weakly Ultrahomogeneous Structures", Aspects of Computation, National University of Singapore, September 2017.
11. "Injection structures specified by finite state transducers", Computability and Complexity 2017, Raunati, New Zealand, January 2017
12. "Random members of Π_1^0 classes", AMS Sectional Meeting, Minneapolis, October 2016
13. "Random numbers as probabilities of machine behaviour", Computability, Randomness and Applications, CIRM, Luminy, France, June 2016
14. "Index sets for Logic Programming", Logical Foundations of Computer Science (LFCS 2016), Deerfield Beach, Florida, January 2016.
15. "Algorithmically random functions and effective capacities", Universitat der Bundeswehr, Munich, December 2015.

16. "Algorithmically random functions and effective capacities", Varieties of Algorithmic Information, Heidelberg, June 2015.
17. "Compressibility of closed sets", CCR 2015, Heidelberg, June 2015.
18. "Randomness and capacity", TAMC 2015, Singapore, May 2015.
19. "Weakly ultrahomogeneous structures", Special Session on Computable Structure Theory, AMS Sectional Meeting, Washington, D.C., March 2015.
20. "Algorithmically random functions and effective capacities", Winter Meeting of Canadian Math. Society, Hamilton, Ontario, December 2014.
21. "Ultrahomogeneous structures", Colloquium Talk, College of Charleston, November 2014.
22. "Automatic Injection Structures", Computability in Europe (CiE 2014), Budapest, June 2014
23. "Computability and Categoricity of Ultrahomogeneous Structures", Computability in Europe (CiE 2014), Budapest, June 2014
24. "Effective Symbolic Dynamics and Complexity", AMS Special Session, Ames, Iowa, April 2013.
25. "Finite-to-one Structures", AMS-ASL Special Session, San Diego, January 2013.
26. "Sub-computable Bounded Randomness", LFCS 2013 (Logical Foundations of Computer Science, San Diego, January 2013.
27. "Conservatively Approximable Functions", CCA 2012, Cambridge, England, June 2013
28. "Bounded Randomness", Computability in Europe 2012, Cambridge, UK, June 2012
29. "Effective Injection Structures", Workshop on Incomputability, Newton Institute, Cambridge, England, June 2012
30. " Π_1^0 structures", Logic Seminar, George Washington University, March 2012
31. "Random Sets", Recursion Theory Workshop, Computational Prospects for Infinity, National University of Singapore, August 2011
32. "Effective Categoricity of Injection Structures", CiE 2011, Bulgaria, June 2011
33. "Structures and Isomorphisms in the Difference Hierarchy", Workshop on Computability (Annual ASL meeting), March 2011

34. “Effective Randomness and Capacity”, Algorithmic Randomness Conference, Notre Dame, May 2010.
35. “Effective Symbolic Dynamics”, Colloquium Talk, College of Charleston, October 2009.
36. “Algorithmic Randomness”, Pi Mu Epsilon Talk, University of Florida, September 2009.
37. “ Σ_1^0 and Π_1^0 Equivalence Structures”, Computability in Europe (CIE 2009), Heidelberg, July 2009
38. “Immunity of Closed Sets”, Computability in Europe (CIE 2009), Heidelberg, July 2009
39. “Effective randomness and Capacity of Closed Sets”, Computability in Europe (CIE 2009), Heidelberg, July 2009
40. “Random Union, Intersection and Membership”, Fourth International Conference on Algorithmic Randomness, Luminy, France, June 2009
41. “ μ -randomness of Closed Sets and Elements”, Algorithmic Randomness Workshop, Madison, Wisconsin, May 2009.
42. “Structures in the Difference Hierarchy”, Logic Seminar, Notre Dame University, April 2009.
43. “Randomness and Capacity”, Informal Random Gathering, UC Berkeley, March 2009.
44. “Countable Subshifts”, AMS Special Session on Computable Dynamics, January 2009.
45. “Complexity Theory in Algebra and Combinatorics”, Computability, Reverse Mathematics and Combinatorics, Banff Research Station, December 2008
46. “Algorithmic Randomness”, Colloquium Talk, College of Charleston, April 2008
47. “The Cantor-Bendixson Derivative and the Well-founded Semantics of Logic Programming”, Tenth International Symposium on Artificial Intelligence and Mathematics, Fort Lauderdale, January 2008.
48. “Algorithmic Methods for Equivalence Relations”, AMS Special Session on Algorithmic Methods for Algebraic Structures, Murfreesboro, Tennessee, November 2007
49. “Random Closed Sets and Continuous Functions”, Workshop on Effective Randomness, Chicago, September 2007
50. “Effective Symbolic Dynamics”, CCA 2007 (Computability and Complexity in Analysis), Siena, July 2007
51. “ K -Trivial Closed Sets and Continuous Functions”, CIE 2007 (Computability in Europe), Siena, July 2007

52. “Pseudajump Operators and Π_1^0 Classes”, CIE 2007 (Computability in Europe), Siena, July 2007
53. “Random Closed Sets and Continuous Functions”, Special Session on Computability, AMS Regional Meeting, Storrs, November 2006.
54. “Random Closed Sets and Continuous Functions”, American Institute of Mathematics workshop on algorithmic randomness, August 2006
55. “Random Closed Sets”, Computability in Europe, Swansea, July 2006
56. “Space Complexity of Structures”, Computability in Europe, Swansea, July 2006
57. “Effectively Closed Sets”, ASL Winter Meeting, January 2006, invited hour talk
58. “Complexity of Inductive Definability”, Computability in Europe, Amsterdam, June 2005.
59. “Reverse Mathematics and the Stable Marriage Problem”, Special Session on Reverse Mathematics, AMS Annual Meeting, Atlanta, January 2005.
60. “Logic Programming and Computability”, Special Session on Computability Theory and Applications, AMS Regional Meeting, Chicago, October 2004.
61. “Logic programming with infinite sets”, 8th International Symposium on Artificial Intelligence and Mathematics, Fort Lauderdale, January 2004
62. “Index Sets for Computable Differential Equations”, International Conference on Computability and Complexity in Analysis, Cincinnati, August 2003
63. “Well-ordered intervals in the lattice of Π_1^0 classes”, Workshop on Computability and Logic, Heidelberg, June 2003
64. “Effectively Closed Sets”, Colloquium Talk, East Carolina University, March 2003
65. “Categoricity of Equivalence Structures”, Special Session on “Computability and Models”, Annual AMS Meeting, Baltimore, January 2003
66. “ Δ_2^0 -categoricity of p -groups”, Special Session on “Effectiveness Questions in Model Theory”, AMS Sectional Meeting, Madison, Wisconsin, October 2002.
67. “On the Lattice of Π_1^0 Classes”, Logic Seminar – University of Michigan, May 2002.
68. “Minimal and Thin Extensions of Π_1^0 Classes”, Special Session on Computability Theory with Applications, Annual AMS Meeting, San Diego, January 2002.
69. “Index Sets for ω -languages”, Workshop on Computability and Complexity in Analysis, Schloss Dagstuhl, Germany, November, 2001.

70. “Degrees of Difficulty of Π_1^0 Classes”, ASL Special Session on Reverse Mathematics, Annual Meeting of the Association for Symbolic Logic, Philadelphia, March 2001
71. “The lattice of Π_1^0 classes”, Computability Theory Meeting. Oberwolfach, January 2001
72. “Locally Determined Nonmonotonic Rule Systems”, Colloquium, UC San Diego, May 11, 2000.
73. “The Lattice of Π_1^0 Classes”, ASL Special Session on Computable Model Theory, Winter Meeting of Association for Symbolic Logic, Washington, January 23, 2000.

POSTDOCS SUPERVISED

Rebecca Weber, Fall 2006 (Assistant Professor, Dartmouth)
 George Barmpalias, Fall 2006 (Postdoctoral Fellow, Leeds)
 Christopher Porter, Fall 2014-Spring 2016 (Assistant Professor, Drake University)
