

Speaker	Date	Title	Abstract
James Keesling	01/19/17	Some applications of Little's Law	see abstract below
Sergei Pilyugin	01/26/17	On the effectiveness of marine protected areas for predator-prey communities with differential mobility	see abstract below
Joshua Hiller	02/02/17	On some variations of the multistage model of carcinogenesis	see abstract below
Evan Milliken	02/09/17	Probability of Extinction in Metapopulation Models of Infectious Salmon Anemia virus	see abstract below
Celeste Vallejo	02/16/17	Silent Circulation of Poliovirus in Small Populations	see abstract below
Subhorn Khonthapagdee	03/02/17	Crowding and light limitation affect phytoplankton competition for nitrogen	see abstract below
J. Darby Smith	03/16/17	Intracellular Transport: Molecular Motors, Drag, and Binding	see abstract below
Rebecca Borchering	03/23/17	Continuum approximation of invasion probabilities for stochastic population models	see abstract below
Tom Hladish	04/13/17	Why killing mosquitoes doesn't control dengue, and how to do it better	see abstract below
