

CURRICULUM VITAE

NAME: William W. Hager

PRESENT POSITION: Distinguished Professor

HOME ADDRESS: 462 Little Hall
Gainesville, Florida 32611

DEGREES: Ph.D., Massachusetts Institute of Tech. - 1974
M.S., Massachusetts Institute of Tech. - 1971
B.S., Harvey Mudd College - 1970

RESEARCH INTERESTS: Numerical analysis, optimization, optimal control, lightning.

PROFESSIONAL EXPERIENCE:

Distinguished Professor, 2018–present.
Co-director, Center for Applied Optimization, 1992–present.
Professor, University of Florida, 1988–present.
Professor, The Pennsylvania State University - 1986–1988.
Associate Professor, The Pennsylvania State University - 1980–1986.
Assistant Professor, Carnegie-Mellon University - 1976–1980.
Assistant Professor, University of South Florida, 1974–1976.
Consultant, Naval Surface Weapons Center, 1976–1980.

GOOGLE SCHOLAR:

18,330 citations on September 30, 2023
59 papers cited by at least 59 different papers (h-index)
146 papers with at least 10 citations (i10-index)

OTHER INDICES:

8124 citations by 5853 different articles in Science Citation Index
3522 citations by 3032 different authors in Mathematical Reviews Citation Database.

AWARDS AND FELLOWSHIPS

1. Chinese Operations Research Society Best Paper Prize awarded in 2018 for the paper “Alternating Direction Approximate Newton Method for Partially Parallel Imaging” by William W. Hager, Cuong Ngo, Maryam Yashtini, and Hongchao Zhang, Journal of Operations Research Society of China, 3 (2015), pp. 139-162.
2. SIAM Fellow, 2015–.
3. Colonel Allan R. and Margaret G. Crow Term Professorship, 2015–2016.
4. University of Florida Research Foundation Professorship, 2008–2011.
5. Naval Ordnance Laboratory Postdoctoral Fellowship, 1974 (not accepted)..
6. National Science Foundation Fellowship, 1970-1973..

GRANTS:

1. “Plasticity theory and the finite element method”, National Science Foundation, Award 7509457, 1976–1977, \$6,200.
2. Supported by Office of Naval Research Grant N00014-76-C0369, 1977, George Fix, PI.
3. Supported by Office of Naval Research Grant NR041-543, 1978-1979, George Fix, PI.
4. “Optimal control and finite elements, National Science Foundation, Award 7825526, 1979–1981, \$37587 (with G. Knowles).
5. “Control systems governed by partial differential equations,” National Science Foundation, Award 8101892, 1981–1984, \$111,427, (with W. Mills and G. Chen).
6. “Optimization and numerical analysis,” National Science Foundation, Award 8401758, 1984–1986, \$41,000.
7. “Numerical techniques in control and optimization,” National Science Foundation, Award 8520926, and Air Force Office of Scientific Research Award AFOSR-ISSA-860091, 1986–1989, \$122,770.
8. “Analysis and design of elastic materials,” National Science Foundation Grant DMS8602006 (1986-1988) and Office of Naval Research grant N00014-86-K-0498 (joint grants), \$36,690, (with R. Rostamian).
9. Supported by NASA grant NGL 39-009-003 and by NSF grant ATM 831193, 1987-1988, John Nisbet PI.
10. Coauthor of SCREMS proposal DMS 8704431, \$62,000 (Jerry Bona and William Pritchard PIs).
11. “Optimal Control, Optimal Design, Composite Materials, Layered Materials,” U.S. Army Innovative Research Grant, 1988, \$37,500.

12. "Analysis and optimization of elastic materials," Army Research Office, September, 1989, to September, 1991, \$75,000.
13. "Numerical techniques in control and optimization," National Science Foundation, Award 8903226, June, 1989 to June, 1990, \$15,000.
14. "Numerical techniques in control and optimization," National Science Foundation, Award 9022899, May, 1990 to May 1991, \$24,000.
15. Modeling and measurement of lightning," National Science Foundation, Award 9115752, June, 1991 to June, 1993, \$100,000.
16. "Numerical techniques in control and optimization," National Science Foundation, Award 8520926, June, 1991, to June 1992, \$24,272.
17. "Conference on large-scale optimization," National Science Foundation, January, 1993 to January, 1994, \$15,000.
18. "Conference on large-scale optimization," Army Research Office, January, 1993, to January, 1994, \$10,000 (with D. Hearn).
19. "Lipschitz stability and its application to numerical analysis in optimal control," National Science Foundation, May, 1994 to May 1997, Award 9404431, \$95,940.
20. "Conference on Network Optimization," National Science Foundation, Award 9522573, January, 1996, to January, 1997, \$15,000 (with P. Pardalos and D. Hearn).
21. "Conference on optimal control: Theory, algorithms, and applications," National Science Foundation, January, 1997, to January, 1998, \$7,500.
22. "Discrete approximations in variational problems," National Science Foundation, Award 9704912, July, 1997, to July 2000, \$135,000.
23. "Innovative sparse matrix algorithm," National Science Foundation, Award 9803599, July, 1998, to July, 2001, \$192,729, (with Tim Davis).
24. "Modeling and Optimal Design in Micro-optics," National Science Foundation, Award 9815798, March, 1999, to March, 2002, \$17,100 (with Gang Bao and Shari Moskow).
25. "Sparse matrix algorithms and their application to dual active set techniques in optimization," National Science Foundation, Award 0203270, July, 2002, to July 2006, \$510,000 (with Tim Davis).
26. "University of Florida 2003/2004 Special Year in Mathematics," National Science Foundation, Award 0324609, September, 2003, to September, 2004, \$30,000 (with Y. Chen, S. Moskow, T. Davis, and J. Gopalakrishnan).
27. "SCREMS: Developing Computational Mathematics at the University of Florida," National Science Foundation, Award 0619080, July, 2006, to July, 2009, \$81,000 (with J. Gopalakrishnan, S. Moskow, T. Davis, B. Mair).

28. “MSPA-ENG: Scalable Sparse Matrix Algorithms and Software for Nonlinear Optimization,” National Science Foundation, Award 0620286, August, 2006, to August, 2009, \$460,000 (with T. Davis).
29. “CMG COLLABORATIVE RESEARCH in Measurement and Analysis of Thunderstorm Electrification and Lightning,” National Science Foundation, Award 0724750, September, 2007, to August, 2011, \$426,368 (Joint project with New Mexico Tech receiving \$619,477 in DMS 0724771 for instrumentation development, Hager is overall project PI).
30. “A Computational Approach for Near-Optimal Path Planning and Guidance for Systems with Nonholonomic Constraints,” Army Research Office, Award 55173-CI, January, 2009, to September, 2009, \$50,000 (with Anil Rao).
31. “Next-Generation Framework for Real-Time Solutions of Nonlinear Optimal Control Problems,” Office of Naval Research, Award N000141110068, November 1, 2010, to September 30, 2013, \$551,728 (with Anil Rao).
32. “A Computational Framework for Rapid, Reliable, and Robust Solutions to Complex Constrained Nonlinear Optimal Control Problems,” Defense Advanced Research Projects Agency (DARPA), October 24, 2011, to October 23, 2014, \$988,194 (with Anil Rao).
33. “Collaborative Research: Fast TV-Regularized Large-Scale and Ill-Conditioned Linear Inversion with Application to PPI,” National Science Foundation, September 15, 2011, to September 14, 2014, \$241,579 (with Yunmei Chen).
34. “Third University of Florida SIAM Gators Conference,” National Science Foundation, March 15, 2014, to March 14, 2016, \$15,300 (with Yunmei Chen, Maia Martcheva, and Scott McKinley).
35. “Innovations in Large-Scale Sparse Optimization and Applications,” Office of Naval Research (Mathematics), March 1, 2015, to February 28, 2018, \$479,869 (with Anil Rao).
36. “Fast Sparse Nonlinear Optimization and its Application to Optimal Control,” National Science Foundation DMS, July 15, 2015, to June 30, 2018, \$294,061 (with Anil Rao).
37. “Pseudospectral Optimal Control for Flight Trajectory Optimization,” (Phase 1) US Navy, June 16, 2015, to January 15, 2017, \$72,500 (with Anil Rao).
38. “Solution of Optimal Control Problems for Boost Glide High-Speed Applications,” Air Force Research Laboratory, September 9, 2015, to December 7, 2017, \$358,843 (with Anil Rao).
39. “Pseudospectral Optimal Control for Flight Trajectory Optimization,” (year 1 of phase 2) Office of Naval Research, January 5, 2017, to January 4, 2018, \$143,904 (with Anil Rao).
40. “Pseudospectral Optimal Control for Flight Trajectory Optimization,” (year 2 of phase 2) Office of Naval Research, January 5, 2018, to January 4, 2019, \$151,676 (with Anil Rao).

41. “Innovations in the use of Second Derivatives in Large-Scale Sparse Optimization,” Office of Naval Research, March 1, 2018, to February 28, 2019, \$91,735.
42. “Polyhedral Techniques for Fast Sparse Nonlinear Optimization and their Application to Nonsmooth Optimal Control,” National Science Foundation, August 1, 2018, to July 31, 2021, \$200,000 (with Anil Rao).
43. “Improved Numerical Methods for Solving Optimal Control Problems with Nonsmooth and Singular Solutions,” National Science Foundation, January 1, 2021, to December 31, 2024, \$609,025 (with Anil Rao).
44. “A Novel Computational Framework for Real-Time Optimal Control,” Office of Naval Research, May, 2022, to April, 2025, \$650,000 (with Anil Rao).

HONORARY SOCIETIES:

ORGANIZATIONS:

Society for Industrial and Applied Mathematics
 Mathematical Programming Society
 American Geophysical Union

EDITORIAL BOARDS:

SIAM Journal on Optimization (Associate editor, 2013–2021)
 Computational Optimization and Applications (Managing editor, 1992–)

OTHER PROFESSIONAL ACTIVITIES:

1. Participated in several international meetings in Poland, Bulgaria, China, Korea, Romania; 5 conferences at Oberwolfach.
2. Invited Professor at the Institut de Recherche d’Informatique et d’Automatic, Rocquencourt, France, October–December, 1975 (now INRIA).
3. Invited Professor at Systems Research Institute, Polish Academy of Sciences, September 1–15, 1977, and September 3–12, 1979.
4. Invited Professor, Mathematics Research Center, University of Montreal, May, 1977.
5. Invited Professor, Department of Mathematics, Colorado State University, Fort Collins, Colorado, Spring Term, 1980.
6. Advisor, Personnel Committee for appointments in applied mathematics, Pennsylvania State University, 1980–1981.
7. Liaison Committee between the Mathematics Department and the Dean, Pennsylvania State University, 1980–1982.

8. Personnel Committee, Pennsylvania State University, 1981–1985.
9. Applied Analysis Chairman, Pennsylvania State University, 1983–1986.
10. Numerical Analysis Chairman, Pennsylvania State University, 1987–1988.
11. Graduate Affairs Committee, Pennsylvania State University, 1981–1984.
12. Computer Committee, Pennsylvania State University, 1982–1988.
13. Editor-in-Chief of the journal Computational Optimization and Applications, 1992–present.
14. Program Director for SIAM Activity Group on Signals, Systems, and Control, 1998–2001.
15. Co-chair of the 2001 SIAM Control Conference.
16. Organized four conferences (Large-scale optimization, network optimization, optimal control, and multiscale optimization) between 1993 and 2004, published a book with each conference consisting of presented papers.
17. In 2013, organized a minisymposium for the SIAM Annual Meeting entitled Recent Advances in Computational Algorithms for Image Analysis and a minisymposium for the SIAM Control Conference entitled Direct Transcription Methods in Optimal Control.
18. With the students in UF’s SIAM student chapter, the SIAM Gators, we have organized the Third SIAM Gators Student Conference, March 27–29, 2014.
19. With Hongchao Zhang, organized two sessions at the International Symposium on Mathematical Programming, July 12–17, 2015, entitled Recent Advances in Computational Optimization.
20. CBMS Principal Lecturer for Computational Methods in Optimal Control, July 23–27, 2018, Jackson State University.
21. With Mahya Aghaee organized a minisymposium for the SIAM Conference on Control and Applications (July, 2021, Spokane). With James Diffenderfer organized a minisymposium for the SIAM Conference on Optimization (July, 2021, Spokane)..

REVIEWING & REFEREEING ACTIVITIES

100 reviews written of articles that appear in Mathematical Reviews. Have served on numerous NSF panels; evaluate proposals for NSF, Army, DOE, Hong Kong Research Grants Council, and European agencies; review about 1 journal article per month. In addition, the following books have been reviewed:

1. Functional Analysis and Linear Control Theory by J.R. Leigh, SIAM Review, 24 (1982), 349.
2. Mathematical Programming and Control Theory by B.D. Craven, SIAM Review, 22 (1980), 377–378.
3. Optimal Processes on Manifolds by Roll Nottrot, SIAM Review, 27 (1985), 104.

4. Numerical Analysis of Variational Inequalities by R. Glowinski, J.L. Lions, and R. Tremolieres, Bulletin of the American Mathematical Society, 8 (1983), 100-102.
5. Analysis of Global Expansion Methods: Weakly Asymptotically Diagonal Systems, by L.M. Delves and T.L. Freeman, SIAM Review, 25 (1983), 123-124.
6. Computational Functional Analysis by Remon E. Moore, SIAM Review, 28 (1986), 260.
7. A Rational Finite Element Basis by G. Wachspress, Mathematical Reviews.
8. An Introduction to the Mathematical Theory of Finite Elements by J.T. Oden and J.N. Reddy, Mathematical Reviews.
9. Advances in Nonlinear Parameter Optimization by Rudiger Schmidt, Mathematical Reviews.

MENTIONED IN LISTINGS:

Men and Women of Science, Marquis Who's Who, and other related listings.

THESES AND DISSERTATIONS DIRECTED:

1. George D. Ianculescu, Ph.D., 1979, "Semi-dual approximations for convex optimal control problems".
2. Dwayne L. Presler, Ph.D., 1984, "A dual approach to minimax".

98. "Exploiting structure in sparse optimization," Conference on Continuous Optimization, Campinas, Brazil, July 28–31, 2008.
99. "Discrete Approximations in Optimal Control," The Banach Center Conference on 50 Years of Optimal Control, Bedlewo, Poland, September 15-20, 2008.
100. "An Affine-scaling Interior-point CBB Method and Applications," The Second SIAM Gators Student Conference, Gainesville, FL, March 3-5, 2009.
101. "Discharging Structure of a Mountain Thunderstorm," SIAM Gator Seminar, Gainesville, FL, January 27, 2009.

102. "An Affine-scaling Interior-point CBB Method and Applications," International Conference on Engineering and Computational Mathematics, The Hong Kong Polytechnic University, 27–29 May, 2009.
103. "Direct Trajectory Optimization and Costate Estimation of General Optimal Control Problems Using a Radau Pseudospectral Method," SIAM Conference on Control and Its Applications, Denver, July 6–8, 2009.
104. "An Affine-scaling Interior-point Method and Its Application to Support Vector Machines," NSF CMMI Research and Innovation Conference, June 22–25, 2009.
105. "An Affine-scaling Interior-point CBB Method and Support Vector Machines, International Symposium on Mathematical Programming, University of Chicago, August 24–28, 2009.
106. "Pseudospectral methods in optimal control," Linear and Numerical Linear Algebra: Theory, Methods, and Applications at Northern Illinois University, August 12–14, 2009.
107. "Analysis of interesting flashes during a thunderstorm near Langmuir Laboratory on 24 August 2007," American Geophysical Union, Fall Annual Meeting, December 14–18, 2009.
108. "Pseudospectral Methods in Optimal Control presented at the Conference on Control and Optimization with Differential-Algebraic Constraints," Banff International Research Station for Mathematical Innovation and Discovery, October 24–29, 2010. One of two (out of 40) talks selected for video taping and for posting on the conference web page.
109. "Gradient-based Methods for Sparse Recovery," SIAM Annual Meeting, Minisymposium on Recent Advances in Optimization Methods and Applications, Pittsburgh, 2010.
110. "An Affine-scaling Interior-point BB Method for Polytope Constrained Optimization," SIAM Conference on Optimization, Darmstadt, Germany, May 16–19, 2011.
111. "An Affine-scaling Interior-point BB Method for Polytope Constrained Optimization," International Congress on Industrial and Applied Mathematics (ICIAM), Vancouver, July 18–22, 2011.
112. "Charge retrieval for distant and nearby flashes using the Langmuir Electric Field Array (LEFA)," Fall Meeting, American Geophysical Union, San Francisco, December 5–9, 2011.
113. "Limited Memory Nonlinear Conjugate Gradients," International Symposium on Mathematical Programming, Berlin, August 19–24, 2012.
114. "A Primal-Dual Active Set Algorithm for Nonlinear Optimization with Polyhedral Constraints," International Symposium on Mathematical Programming, Berlin, August 19–24, 2012.

115. "Convergence of a Gauss Pseudospectral Method for Optimal Control," AIAA Guidance, Navigation, and Control Conference, Minneapolis, August 13-16, 2012.
116. "Charge Distribution in an Intracloud Flash," Fall Meeting, American Geophysical Union, San Francisco, December 3-7, 2012.
117. "A primal-dual active set algorithm for nonlinear optimization with polyhedral constraints," International Symposium on Continuous Optimization, Lisbon, July 27 – Aug 1, 2013.
118. "A dual active set algorithm for projection on a polyhedron, SIAM Optimization Conference," San Diego, May 12–14, 2014.
119. "Convergence of an hp-collocation method for optimal control," Southeastern-Atlantic Regional Conference on Differential Equations, Memphis, October 11–12, 2014.
120. "The Polyhedral Projection Problem," 17th British-French-German Conference on Optimization, London, June 15-17, 2015.
121. "Convergence Rate for Gauss Collocation in Unconstrained Optimal Control," SIAM Conference on Control and its Applications, Paris, July 8-10, 2015.
122. "The Polyhedral Projection Problem," International Symposium on Mathematical Programming, Pittsburgh, July 12-17, 2015.
123. "Inexact Alternating Direction Method of Multipliers for Separable Convex Optimization," Florida Day on Inverse Problems and Imaging, University of Central Florida, February 5, 2016.
124. "Pseudospectral Methods in Optimal Control," Plenary talk at the Southeastern-Atlantic Regional Conference on Differential Equations, Florida Gulf Coast University, November 6, 2016, <http://lebesgue.fgcu.edu/SEARCDE2016/>.
125. "An Active Set Algorithm for Nonlinear Optimization with Polyhedral Constraints," The Fifth International Conference on Continuous Optimization, Tokyo, August 9, 2016.
126. "Convergence Rate for a Gauss Collocation Method Applied to Constrained Optimal Control," Finite Element Circus, Worcester Polytechnic Institute, October 15, 2016.
127. "Implementation of an Active Set Algorithm for Nonlinear Optimization with Polyhedral Constraints," SIAM Optimization Conference, Vancouver, May 22, 2017.
128. "Pseudospectral Methods in Optimal Control," SIAM Control Conference, Pittsburgh, July 10, 2017.
129. "Optimization with polyhedral constraints," plenary talk at the West Coast Optimization Conference, September 16, 2017.
130. "An Active Set Algorithm for Polyhedral Constrained Optimization," International Symposium on Mathematical Programming, Bordeaux, July 6, 2018.

131. "Convergence of an Inexact ADMM for Separable Convex Optimization," International Conference on Continuous Optimization, Berlin, August 6, 2019.
132. "Convergence of an Inexact ADMM for Separable Convex Optimization," Conference on Nonsmooth Analysis and Applications, Southern University of Science and Technology (SUS Tech), Shenzhen, China, December 8, 2019.
133. Invited semi-plenary speaker for the 15th Viennese Conference on Optimal Control and Dynamic Games, Vienna, Austria (originally scheduled for July, 2020, but now postponed to July, 2022).
134. "SuiteOPT and the Polyhedral Active Set Algorithm," Invited speaker for the SIAM Conference on Optimization, Spokane, July 23, 2021..
135. "A Hessian-based Implementation of the Polyhedral Active Set Algorithm," Invited speaker for the International Conference on Continuous Optimization, Lehigh University, July 25, 2022..
