

# Concepts in Calculus III

## Multivariable Calculus

Sergei V. Shabanov

Department of Mathematics, University of Florida,  
Gainesville, FL 32611 USA

Latest Edition: 2019  
Fist Edition: University of Florida Press, Gainesville, 2012  
ISBN 978-1-61610-162-6

# Contents

<b>Chapter 1. Vectors and the Space Geometry</b>	3
1. Rectangular Coordinates in Space	3
2. Vectors in Space	27
3. The Dot Product	43
4. The Cross Product	62
5. The Triple Product	80
6. Planes in Space	98
7. Lines in Space	110
8. Euclidean spaces	126
9. Quadric Surfaces	134
Selected answers and hints to exercises	152
<b>Chapter 2. Vector Functions</b>	157
10. Curves in Space and Vector Functions	157
11. Differentiation of Vector Functions	173
12. Integration of Vector Functions	185
13. Arc Length of a Curve	195
14. Curvature of a Space Curve	205
15. Applications to Mechanics and Geometry	220
Selected answers and hints to exercises	237
<b>Chapter 3. Differentiation of Multivariable Functions</b>	241
16. Functions of Several Variables	241
17. Limits and Continuity	253
18. A General Strategy to Study Limits	267
19. Partial Derivatives	282
20. Higher-Order Partial Derivatives	288
21. Differentiability of Multivariable Functions	297
22. Chain Rules and Implicit Differentiation	315
23. The Differentials and Taylor Polynomials	333
24. Directional Derivative and the Gradient	358
25. Maximum and Minimum Values	375
26. Extreme Values on a Set	390
27. Lagrange Multipliers	405
Selected answers and hints to exercises	422

<b>Chapter 4. Multiple Integrals</b>	429
28. Double Integrals	429
29. Properties of the Double Integral	443
30. Iterated Integrals	452
31. Double Integrals over General Regions	460
32. Double Integrals in Polar Coordinates	476
33. Change of Variables in Double Integrals	490
34. Triple Integrals	509
35. Triple Integrals in Cylindrical and Spherical Coordinates	524
36. Change of Variables in Triple Integrals	539
37. Improper Multiple Integrals	552
38. Line Integrals	568
39. Surface Integrals	575
40. Moments of Inertia and Center of Mass	592
Selected answers and hints to exercises	604
<b>Chapter 5. Vector Calculus</b>	607
41. Line Integral of a Vector Field	607
42. Fundamental Theorem for Line Integrals	619
43. Green's Theorem	633
44. Flux of a Vector Field	645
45. Stokes' Theorem	657
46. Gauss-Ostrogradsky (Divergence) Theorem	669
Selected answers and hints to exercises	680
<b>Acknowledgments</b>	681
